

## ARCHITECTURE & CHILDREN: UIA Built Environment Education Network

Object: Information 2020, Maui Hawaii, USA.

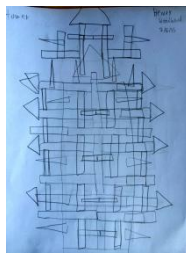

### January: Educated By Nature

Creating opportunities for children to learn within nature.

### February: Growin up with architecture

Discovering structure and materials.

### March: Montessori School spring program canceled.

Hawaii's 283 public schools plus all the private schools have been officially closed since March 12, That was the last day for the public school.

Schools are expected to stay shut until CIVID-19 is no longer spreading in the community, define as four weeks with no new cases, according to the States department of Education.

Teachers are working remotely with students on coursework instead of traditional in-person, Instructions, teachers are utilizing an instructional enrichment approach that will continue to engage students in a modified approach learning until school buildings reopen.

This enrichment involves a mixed methodology approach, such as independent projects, study packets, distance learning and e-conferencing, with an increased utilization of the technology to the extent possible.

Those teaching the elementary and middle school levels have to create instructional materials for both students and parents, while high schools students are more independent learners.

Training has been necessary for faculty, staff, students and parents on the use of learning systems to ensure continuity for children to keep learning.

They are also providing meal services programs for school-aged children and adolescents for any child eighteen years of age or younger.
